

FOGUIENG KAMGA JOSIAS

NETWORK & IT SECURITY TECHNICIAN

Douala, Cameroon | +237 690 855 303 | josiaskamga01@gmail.com

Languages: English (Advanced — TOEFL iBT: 90/120), French (Native)

PROFESSIONAL SUMMARY

Detail-oriented Network and IT Security graduate passionate about cybersecurity, systems administration, and virtualized infrastructures. Backed by hands-on skills in deploying robust virtual environments (Proxmox VE, VMware) and technical credentials validated through immersive corporate simulation programs with global industry leaders (Mastercard, Tata Consultancy Services). Fully bilingual in English and French (TOEFL iBT 90), highly disciplined, and committed to designing and safeguarding resilient enterprise IT architectures.

EDUCATION & ACADEMIC CREDENTIALS

Associate Degree (BTS) in Network and IT Security

Expected Graduation: July 2026

Institut Universitaire de la Côte (IUC) — Douala, Cameroon

- **Relevant Coursework:** Network Architecture Modeling, Advanced Routing & Switching, Implementation of Enterprise Security Policies, Systems Administration, and Firewall Configuration.

No-Code Technology Training Certificate

July 2026

Orange Digital Center — Cameroon

- Mastered agile design of digital solutions, rapid prototyping, and workflow automation without traditional programming constraints.

VIRTUAL INTERNSHIPS & CORPORATE SIMULATIONS

Cybersecurity Security Analyst Simulation

April 2026

Tata Consultancy Services (TCS) — via Forage

- Analyzed complex enterprise security incidents, identified logical system vulnerabilities, and formulated actionable mitigation roadmaps.
- Evaluated threat vectors and presented technical security recommendations aligned with enterprise risk management frameworks.

Cybersecurity Virtual Experience Certification

November 2025

Mastercard — via Forage

- Engaged in practical analysis of digital threat vectors, transaction security models, and cyber risk compliance strategies.
- Assessed security awareness, authentication protocols, and payment gateway protection models under industry-standard compliance.

KEY TECHNICAL PROJECTS

MikroTik Captive Portal & Network Supervision (Capstone Project)

- Architected and deployed a secure MikroTik captive portal featuring strict user authentication, bandwidth management, and granular access control logic.
- Mapped full network traffic flows and implemented proactive, real-time automated security alerts using *The Dude* network monitoring tool.

Firewall Configuration, IDS/IPS Solutions & VLAN Segmentation

- Enforced strict network filtering rules, secured VLAN traffic isolation, and configured intrusion detection/prevention systems (IDS/IPS).

- Virtualized isolated test environments and server infrastructure using Proxmox VE, VMware vSphere/Workstation, and VirtualBox.

TECHNICAL SKILLS & COMPETENCIES

Security & Networking:	Firewalls, IDS/IPS, Wireshark, Nmap, TCP/IP, VLAN Segmentation, VPN, DHCP, DNS, Vulnerability Assessment.
Systems & Virtualization:	Proxmox VE, VMware vSphere / Workstation, VirtualBox, Linux (Ubuntu, Kali Linux), Windows Server.
Tools & Technologies:	MikroTik RouterOS, The Dude, Cisco Packet Tracer, Process Automation, No-Code Platforms.
Soft Skills & Competencies:	Technical rigor, analytical thinking, autonomous learning, cross-cultural adaptability, problem-solving.

LEADERSHIP, ATHLETICS & INTERESTS

- **Competitive Middle-Distance Running (800m & 1500m):** Active amateur runner in middle-distance track events; cultivates mental endurance, strict individual discipline, resilience, and focus under pressure.
- **Technical Scouting & Continuous Reading:** Active threat intelligence tracking, tech scouting, and reading broad literature to foster a sharp analytical mindset.
